Home » Energy Resources » Information » Cost Of Gas

Monthly Cost Of Gas: Commodity Charge Per Month

Long Beach Energy Resources Department's cost of gas is calculated using two pricing portfolios:

- Core customers
- Non-Core customers

These two portfolios may be comprised of any one or combination of three increments of supply as follows:

- Interstate supplies delivered into the Southern California Gas Company's intrastate pipeline system,
- Gas storage withdrawals, and
- Any local gas delivered directly to Long Beach Energy Resources Department's pipeline system.

For more detailed information on how the commodity charge is calculated, refer to the specific rate schedules that are listed on our [Gas Rates](#) page. The **Core Commodity Charge** applies to those customers billed under Rate Schedule 1, 2, 3 and/or 5. The **Non-Core Commodity Charge** applies to those customers billed under Rate Schedule 4 and/or 7.

The monthly Commodity Charges for each of the previous 15 months are as follows:

[Core Commodity Charge \(per Therm\)](#)

[Non-Core Commodity Charge \(per Therm\)](#)

[BTU FACTOR](#)

| Month | Core Commodity Charge (Per Therm) |
|---------------|-----------------------------------|
| February 2019 | \$0.4707 |
| January 2019 | \$0.7895 |
| December 2018 | \$1.3465 |
| November 2018 | \$0.5858 |
| October 2018 | \$0.4090 |

\$0.4707
